FIRECHIEF® KITCHEN STOVE GUARD

FIRECHIEF®
making the world a safer place

Includes app for easy installation

MODEL:
FSW1E

The Firechief® Kitchen Stove Guard prevents kitchen fires before they can start by swiftly alerting you to potential fire hazards and cutting the electricity to the stove in a hazardous situation.

Features

- Single Control Unit for simple installation
- Control Unit factory paired with sensor
- Optional hood, wall or ceiling installation (self adhesive brackets included)
- Tested in accordance to EN50615:2015 - Category B
- Advanced technology with 8x8 matrix heat detection sensor
- Includes both a cupboard sticker and a greetings card with simple product guides for the end-user
- Suitable for all electric stove types

New Firechief® Kitchen Stove Guard app for installers only.

Supports easy installation with BLE connectivity to the Sensor Unit. Quickly view the system status and change installation configuration such as stove type and sensor placement. Easily programmable automatic safe timer limit also available through the app

FIRECHIEF® KITCHEN STOVE GUARD

FIRECHIEF®
making the world a safer place

MODEL:
FSW1E

Next generation fire protection is about stopping fires before they start.

On average, cooking causes over a half of all accidental house fires in the OECD countries. A new risk factor adding to the fire scenario is synthetic interior and furniture materials which cause the fire to engulf the room 10 times faster than previously, when more traditional, natural materials were in use. This reduced escape time underlines the need for fire-preventing technology that **stops the fire before it starts**.

The Firechief® Kitchen Stove Guard includes an intelligent heat sensor that is attached above the cooker and a Control Unit that cuts off the cooker power supply. It reacts to cooktop fire risk indicators earlier than any other cooker safety device, helping to dramatically reduce the number of accidental house fires.

World's most advanced heat sensor technology

All-round protection that exceeds the requirements of the EN 50615 Stove Guard standard and fulfils the requirements for all types of installations (cooker hood, wall, ceiling)

Flexibility for all needs

Feature profiling based on user group and cooker type - the Stove Guard can easily be adapted to the needs of special user groups. Furthermore, it offers additional features for basic, mechanical cookers with no in-built safety features.

Box contents:

Control Unit for fixed installation
Sensor Unit
Batteries (2 x AAA)
Quick start guide
Mounting brackets

Control Unit

Mounting brackets
