Emergency Service Lockers

Cleaning & Maintenance

Clean paint work periodically with warm soapy water or foaming cleaner. Oil hinges and lock sparingly as required with a light oil (3in1 or similar).

Locker Construction

General Construction:

- 0.7mm mild steel, pop riveted carcass construction.
- Coat Rails are 1 inch in diameter.
- Supplied with captive coat hangers - 1 per rail.
- Rust-resistant galvanised shelves
- Delivered as a fully assembled unit.
- Fitted with standard master cam locks with 2,000 differs.
- Door aperture has return bends to eliminate open gaps.
- Available with solid or perforated doors, with the choice of a flat top or sloping top.
- Reaction to Fire Classification EN 13501-1 – supporting documents are available from our sales or marketing team.

Locker Door Construction:

Material: 0.9mm Mild Steel

A stiffener is spot welded vertically in the centre of the door with two 2½" butt hinges spot welded to the door. The door is attached to the carcass via the hinges, with 4.8mm pop rivets. The door has two-point locking bar with a standard cam lock mechanism.

Replacement Locks & Spare Keys

Replacement locks and keys are available from QMP.
Replacement keys are available from Fast Key Ltd.
www.fastkeys.co.uk - sales@fastkeys.co.uk.
